WORKSHOP OF INITIATION TO BLACK AND WHITE LABORATORY

the workshop

10 well attended and succesful issues of this workshop were made in the country house Mas Can Vila, La Garrotxa, between 2013 and 2015. Now is presented a version adapted to the city. The laboratory has been transported to Barcelona Visions Gallery, which includes the right conditions to install.

Barcelona Visions gallery adapted as a laboratory / darkroom

objective

Intended to teach the participant on the basic techniques of photographic laboratory, so that it gets the understanding of the process at all stages, working in the behavior of the photosensitive material (film and paper), chemical dilutions and the processes of measuring light. It is a purely technical workshop, not evaluative of any artistic or creative sense.

structure

The workshop is divided into four modules of four hours each.

Module 1: The photographic image. The light managing. Fieldwork.

Module 2: The laboratory. The chemical process to get the negative.

Module 3: The contact sheet.

Module 4: The printing process.

Schedule

Each module lasts 4 hours and is done on a different day, with some flexibility for the participant.

Module 1: Dissabte or Diumenge 10 to 14h.

Modules 2, 3, 4: 17h-21h, dates to determine with the participant.

inscription:

To make the inscription, participants must complete the registration form to be sent with personal data, send it to Barcelona Visions (barcelonavisionslab@gmail.com) and enter the full amount of the workshop (230 €) to the bank account of Barcelona Visions with the reference: 'Initiation to BW Laboratory'.

The price of the workshop includes the photographic material, notes and future enquiry. The participant can bring his film camera (universal 135mm) or medium format (120mm). In cas of not having camera it will be provided for.
